SUMMARY

As a dedicated full-stack web developer with 1-2 years of hands-on experience in a dynamic startup environment, I bring a passion for learning and a reputation as a fast learner. I am committed to staying at the forefront of technology, constantly honing my skills through personal projects that showcase my ability to implement best practices and optimization techniques. My focus on website performance, user experience, and functionality reflects my commitment to delivering high-quality results in every project I undertake.

TECHNOLOGIES

- **Languages:** JavaScript, TypeScript, Ruby, Java, MySQL, PostgreSQL
- **Frameworks:** Ruby on Rails, ReactJS, NextJS, TailwindCSS, Foundation, Bootstrap, Supa
- **Others:** Git, Firebase, Supabase, Redis, OAuth, Linux CLI, Microsoft Power Platform, Docker

---

WORK EXPERIENCES

Junior Web Developer at Squadzip | *August 2022 - Present*
- Developed current web application by updating its technology to newer technologies with optimized solutions and best practices in both Front-end and Back-end of the application.
- Migrated features created from old technology to newer technologies using ReactJS and Ruby on Rails for better performance and new UI.
- Implemented Facebook and Google Single Sign-On using OAuth2.0 and accessing API to fetch user data.
- Work closely with product management, maintaining old and new features of the application.
- Upgraded web application libraries such as ReactJS to newer versions and removed deprecated functions to replace them with recommended functions.
- Refactored previously developed features to implement better approaches and optimizations by utilizing ReactJS state management best practices like Context API,
- Utilized Redis to store a database read request to optimize the read operation of the web application for faster load time and response time.

Application Developer Intern at Accenture | *February 2022 - June 2022*
- Created diagrams and UI designs for the planning and development phase of the project.
- Developed an internal tool application through Microsoft Power Apps
- Participated in team collaboration and sprint meetings.

EDUCATION

Bachelor of Science in Information Technology - Saint Louis University   *June 2022*

PROJECTS

- **Realtime Chat using Firestore - GitHub**
  - A simple real-time chat that uses Firebase authentication and Firestore for real-time database subscription. Used ***React + TypeScrip*t** as a front-end library and ***TailwindCSS***.
- **Shopping Cart - GitHub**
  - A simple shopping cart using ***React + TypeScript*** demonstrating the use of ***Context API*** for state management.
- **Simple Social Media Application - GitHub**
  - A simple social media web application using ***React*** demonstrates React hooks for managing states.
- **DICT Asset Management System**
  - An asset management system built on Laravel PHP, Javascript, and MySQL as a database management system (Thesis Project)
